AccuteX EDM to Introduce **NEW** Accutex Die Sinker EDMs at IMTS 2010

Lorain, OH, July 27, 2010 – AccuteX EDM, a division of Absolute Machine Tools, Inc., is pleased to introduce the addition of Accutex Die Sinker EDMs to its successful Accutex Wire EDM lineup. These new models featuring the Accutex Windows CE controller, completes our EDM offering.

The Accutex Die Sinker EDMs are manufactured using rigid, heavily ribbed Meehanite castings. To ensure high accuracy and integrity, the machine structures were designed using Finite Element Analysis (FEA).

Accutex Die Sinker EDMs use only premium grade components such as Schneberger linear ways, ultra fine finish ballscrews, high resolution servo motors, high accuracy optical scales, and an ultra-precise direct couple drive system with no belts.

The Windows based CE control features an operator-friendly 15" full color flat touch screen display. The easy to use conversational programming system uses graphic instructions for operational ease by both experienced and new operators.

Machine sizes range from 12"x10"x10" up to 123"x39"x24" in XYZ. Dual rams are available on larger models. Options include built-in C-axis with 360 degree positioning, automatic electrode changer (AEC), oil chiller, and tooling packages.

The NEW Accutex DS-5040 will be on display in AccuteX EDMs Booth E-4615 at IMTS 2010.

About AccuteX EDM

AccuteX EDM, a division of Absolute Machine Tools, Inc. provides advanced EDM solutions and comprehensive training services to their EDM customers. AccuteX EDM is a leading importer and distributor of AccuteX Technologies EDM products and TOPEM drills and diesinkers. The company, based in Mason, Ohio, has a large warehouse of stocked parts

**1111 Western Row Road * Mason, OH 45040 * 513/701-5550 *

and consumables, which, in most cases, are able to be packed and shipped the same day. AccuteX EDM prides itself on offering lifetime training to all of their customers for as long as they own their AccuteX Wire EDM machine. The Mason, Ohio office boasts an in-house hands-on training program twice a month (visit www.accutexedm.com to view upcoming training dates) to suite their customers' schedules. AccuteX EDM is your one-stop EDM supplier.

Products and Services

AccuteX EDM proudly represents the following partners in the United States and Canada:

AccuteX Technologies: AccuteX Technologies developed all of its EDM wire technology in-house and is well-known for its groundbreaking and user friendly Windows-based CE control and high-performance auto wire threading. AccuteX Technologies also offers machines delivering 6-axis control with 5 axis simultaneous interpolation for aerospace and medical-class operating performance.

TOPEDM was founded in 1965 when they launched the first electron discharge machine in Taiwan. Now known world-wide, TOPEDM offers a number of revolutionary CNC EDM drills and diesinkers, including a unique 8-axis CNC high-speed EDM drill that's new to the U.S. and Canada. This machine is ideal for drilling deep holes in Inconel and is particularly well suited for the aerospace market.

Absolute Machine Tools, Inc. adds the AccuteX and TOPEDM lines to its other Taiwanese machine tool offerings, including the highly productive Johnford machining and turning centers; the Johnford Hi-Net line of precision high speed machining centers; Tongtai machining, turning, high-production drill/tap, and 5-axis machining centers; and You Ji vertical turning centers and horizontal machining centers. For 25 years, Absolute Machine Tools has been offering its customers a wide-range of machine tools to fit every need within your shop, and the applications engineers and service technicians to back you up.
